

AGRARIAN → INDUSTRIAL

- In 60 years US becomes leading industrial power
- WHY → Natural Resources, Gov't supported businesses, Growing Urban Population (cheap labor, market for products)

RESOURCES

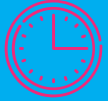

- Coal & Oil
- Iron → dense, but soft, breaks & rusts, add CARBON you get STEEL!!!
- Bessemer Process → Inject Air to remove carbon & other impurities (used in Brooklyn Bridge, farm machinery, railroad tracks)

INVENTIONS

- Edison → light bulb, distribute electric power (run machines, inexpensive, convenient & AWAY FROM WATER!!!!) streetcars (live farther from work)
- Latimer → light bulb w/ filament (bulb burns longer & cheaper)
- Bell → telephone leads to worldwide communication

INDUSTRIALIZATION

THE MEN WHO HELP BUILD AMERICA
