

Assignment 1.7b: Perimeter & Area (Day 2)

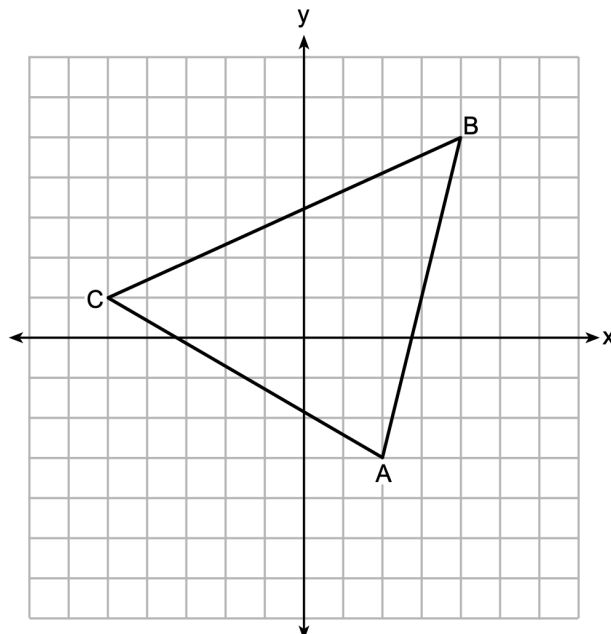

1.

The vertices of $\triangle ABC$ have coordinates $A(-2, -1)$, $B(10, -1)$, and $C(4, 4)$. Determine and state the area of $\triangle ABC$. [The use of the set of axes below is optional.]

2.

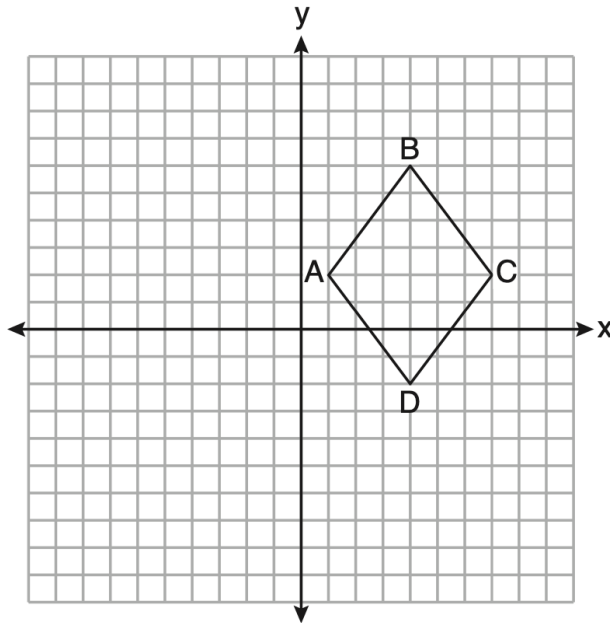

On the set of axes below, $\triangle ABC$ is drawn with vertices that have coordinates $A(2, -3)$, $B(4, 5)$, and $C(-5, 1)$.

Determine and state the area of $\triangle ABC$.

3.

On the set of axes below, rhombus $ABCD$ has vertices whose coordinates are $A(1,2)$, $B(4,6)$, $C(7,2)$, and $D(4,-2)$.

What is the area of rhombus $ABCD$?

4. The points $K(6,8)$, $L(2,0)$, $M(4,-1)$, and $N(8,7)$ form quadrilateral $KLMN$. Determine the area of $KLMN$. [The use of the set of axes below is optional.]
