

PES- Unit 1: Waves & EM Spectrum

UNIT 1 - ASSESSMENT STUDY GUIDE

Section 1 Waves	Section 2 Electromagnetic Spectrum
<u>Class Work/Activities:</u> - Mechanical vs. Light Waves Notes - Types of Waves Notes - Properties of Waves Lab - Properties of Waves Notes - Wave Equation Pixel Art - Light vs. Sound Waves Stations	<u>Class Work/Activities:</u> - EM Spectrum Doodle Notes - EM Spectrum Card Sort Google Slide
<u>Words/Concepts to Know from 1.1:</u> - Describe the 3 different types of waves (longitudinal, transverse and surface) - Identify the parts of a transverse wave (λ, f, amplitude, crest, trough) - Describe the relationship between a wave's frequency, speed and wavelength - Use $v = \lambda * f$ to calculate the speed, frequency or wavelength	<u>Words/Concepts to Know from 1.2:</u> - Is EM radiation a wave or a particle? - List the 7 types of EM Radiation and organize by wavelength and frequency - Know at least one application for each type of EM radiation

WAVES & ELECTROMAGNETIC SPECTRUM VOCABULARY

WORD/PHRASE	DEFINITION
Wave	
Longitudinal Wave	
Transverse Wave	
Surface Wave	
Electromagnetic Spectrum	
Crest	
Trough	
Amplitude	
Wave Speed	
Wavelength	
Frequency	

Mechanical Waves	
Nonmechanical Waves
